No.	TOPIC	Mar-22										Apr-22										May-22										Jun-22								
		14	16	18	20	22	24	26	28	30	31	2	4	6	8	10	12	14	16	18	20	22	24	26	28	30	2	4	6	8	10	12	14	16	18	20	22	24	26	28	30
1	Project Overview																																								
2	Literature Analysis																																								
3	Data Collection																																								
4	Data Analysis																																								
5	Detail Block Diagram																																								
6	Detail Flowchart																																								
7	List of Components																																								
8	Review Design Idea																																								
9	Purchase Components																																								
10	Apps Design																																								
11	Apps Development																																								
12	Simulated Design																																								
13	Review Simulated & Apps Design																																								
14	Prototype Construction																																								
15	Prototype Testing & Analysis																																								
16	Design Sustainability																																								
17	Review Prototype & Apps																																								
18	Technical Report Writing																																								
19	Demonstration																																								
20	Documentation
